DOWNLOAD

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 34 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1912 Excerpt: . . . identical with that of the other engineering courses. The mathematics, physics, mechanical drawing, and mechanics are the same as required for other engineers. In surveying, a preliminary freshman course is followed by a six weeks field course in the Summer School and in the junior year by courses in railway location and mine surveying. General chemistry, qualitative and quantitative analysis, and assaying are taken in the freshman and sophomore years. Special class and laboratory courses in hydraulics and structural, electrical, steam and gas engineering cover the general subjects. Mineralogy is started in the sophomore year, followed by general geology in the junior, and economic geology and petrology in the senior year. The preparatory courses in mining in the junior year cover the subjects of excavation, explosives, quarrying, tunneling, boring, and shaft sinking. In the senior year, courses on prospecting, development and exploitation of mines are given in the first semester and ore dressing in the second semester, with a course in mine engineering through the year. Two courses in metallurgy are given during the senior year. The first covers the general principles and processes, and the second the methods of smelting and refining the base metals. Mining and geological field work form an important part of the course. The course in general geology includes a field course in geological mapping in the vicinity of Madison and excursions to nearby districts. The course in economic geology includes a two weeks mapping trip in the Lake Superior iron...
