However, the amount apparently held by the interior of the plate amounted to only about 0.25 oz., while the total gold for the plate amounted to about 46 oz. On the basis of these experiments, true absorption is negligible, and the removal of the surface to a depth of 0.02 in. would give all the gold, which, from a practicable point of view, would be worth recovering. This could be effected by the use of a large planing machine or by careful scaling or by several repetitions of sweating and scraping with hard scrapers with a fresh addition of mercury between each scraping. This latter method of cleaning recommends itself for use between short custom runs. MISCELLANEOUS PROCESSES OF SEPARATION...
