

Abstracts of Physical Papers from Foreign Sources Volume 2

Filesize: 2.89 MB

Reviews

This publication will be worth purchasing. It really is written in simple terms instead of difficult to understand. It has been designed in an exceptionally simple way and is particularly only right after I finished reading this ebook in which basically modified me, alter the way I believe.

(Prof. Loyce Runolfsson Jr.)

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1896 Excerpt: .of the different rays and the rotatory dispersions. J. B. H. HEAT. 463. Chemical Reactions at Low Temperatures. R. Pictet. (Chem. Ztg. 19. pp. 425-426, 1895.)--This paper contains some further results obtained by the author on the behaviour of gases at very low temperatures. He finds that nitric oxide at--120 no longer combines with the oxygen of the air, and, further, that a mixture of chlorine and hydrogen will not explode under the action of magnesium light, even at--25. Finally, that chlorine and sulphurous acid lose their bleaching-action at--60. G.H. Ba. 464. Zermelo s Thermodynamics. It. Boltzmann. (Wied. Ann. 57. pp. 773-784, 1896.)--Prof. Boltzmann has several times enunciated the view that Maxwell s Law of Partition of Energy is in no sense a dynamical principle deducible from the equations of motion, but is rather to be regarded as a theorem in probability, the distribution in question being the most probable distribution, and in such systems of molecules as are supposed to constitute a gus, the probability of such a distribution preponderating overwhelmingly over that of any other distribution. In a paper entitled Ueber einer Satz der Dynamik und die mechanische Warmetheorie, Herr Zermelo has shown that Prof. Boltzmann s views have not been clearly understood, and he now tries to make the matter clearer.--Herr Zermelo had attempted to apply a certain proposition due to Poincare to the Kinetic Theory of Gases, but Prof. Boltzmann points out that this application is incorrect. From the context, we infer...
