Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from Natural Elementary Geography It demands work from the pupil, rather than from the teacher, while it stimulates independent thought and excites the interest of both. The body of the text abounds in questions that inspire thought, and, at the end of the treatment of each grand division, carefully prepared exercises lead to the correlation and comparison of the parts of the subject already studied, and form a cumulative review and synthesis of the pupil's work. It provides material for the concentration, or correlation, of studies. The text exemplifies the fundamental laws of composition, and may be used in language work. The topics at the end of each lesson outline a few paragraphs in which the pupil can reproduce in his own words the main thought of the lesson. It recognizes the value of map drawing and sand modeling in elementary geography, and introduces them in such manner that they shall be properly used as means to an end, and not as ends in themselves. The relief maps contain the names of the features represented, and require no key maps or other accessories to adapt them for practical use. The maps of coordinate divisions of the land are drawn on the same scale, so that relative areas are accurately depicted and may be directly compared. Thus, a single scale serves for all the maps of the grand divisions; a single, but larger, scale for the maps of the United States and Europe; and a single, but still larger, scale for the sectional maps of the United States, with the exception of that of the Northeastern States, which is drawn on twice the scale of the...
